Unique space in your garden

od 1992 roku.
hefajstos

A photograph of a traditional greenhouse structure. The greenhouse has a complex metal frame with multiple vertical and horizontal bars, and a curved roof. The panes are made of glass. The background shows a dense forest of bare trees, suggesting a late autumn or winter setting. The text "Traditional glazing of greenhouses" is overlaid in the center of the image.

Traditional glazing of greenhouses

Glazing method

We propose the traditional way of glazing a greenhouse using overlapping glass method.

The glass plates is 3 mm thick.

The individual glass pieces overlap each other to form an arc.

Copper hooks are used for this solution.

Silicone also comes along the entire length on each glass piece.

Overlapping glass
with cooper hooks.

Copper hooks
will oxidise over
time and
become darker.

Greenhouse during winter.

Copper hooks are not visible from a distance.
